

6. What are the basic data types in C?

Answer:

- int
- char
- float
- double

7. What is a constant?

Answer: A constant is a value that cannot be changed during program execution.

Example:

```
const float PI = 3.14;
```

8. What is the difference between `=` and `==`?

Answer:

- `=` is the assignment operator.
- `==` is the comparison operator.

9. What are operators in C?

Answer: Operators perform operations on variables and values.

Examples:

- Arithmetic (`+`, `-`, `\*`, `/`)
- Relational (`==`, `!=`, `>`, `<`)
- Logical (`&&`, `||`, `!`)

10. What is an `if` statement?

Answer: It executes a block of code when a condition is true.
