

11. What is an `if-else` statement?

Answer: It executes one block if the condition is true and another if it is false.

---

12. What is a `switch` statement?

Answer: It selects one block of code from multiple options.

---

13. What is a loop?

Answer: A loop repeatedly executes a block of code until a condition becomes false.

---

14. What are the types of loops in C?

Answer:

- for
- while
- do-while

---

15. What is the difference between `while` and `do-while`?

Answer:

- `while` checks the condition before execution.
- `do-while` executes once before checking the condition.
