

21. Why are functions used?

Answer: They improve code reusability, readability, and reduce repetition.

22. What is recursion?

Answer: Recursion is when a function calls itself to solve a problem.

23. What is a pointer?

Answer: A pointer is a variable that stores the memory address of another variable.

Example:

```
int x = 10;
```

```
int *p = &x;
```

24. What do `&` and `\*` mean in C?

Answer:

- `&` returns the address of a variable.
- `\*` accesses the value stored at an address.

25. What is a structure?

Answer: A structure is a user-defined data type that groups different data types together.
